MEDIA COVERAGE

Industry bodies urge Centre to postpone implementation of MSME-payment norm

Industry bodies such as Confederation of All India Traders (CAIT) and Clothing Manufacturers Association of India (CMAI) have urged the Centre to postpone implementation of the [MSME](#) payment amendment in the income-tax.

According to 44 (b) (h), any payment made to registered micro, small or medium enterprises beyond the time limit specified of 45 days of receiving goods or services will not be recognised as an expense and added to the profit of the company for taxation purposes. This will be implemented from Assessment Year 2024-2025 from April 1.

In a statement, CMAI, said, “The protracted issue of delayed payments within the MSME sector has long hindered its growth, and it is commendable that the Government has taken steps to tackle this systemic challenge. Despite the government’s sincere efforts to alleviate the challenges faced by the MSME sector, the unique intricacies of the garment sector have given rise to apprehensions. Issues such as the cancellation of orders from retailers have started to emerge, raising concerns within the industry.”

The industry body said that in the domestic garment industry, the standard payment cycle ranges from 90-120 days. “In response to this amendment, numerous retailers have taken immediate action by issuing “stop supply” directives to their suppliers. Moreover, a significant number of retailers are contemplating the return of unsold merchandise to the manufacturers, thereby absolving themselves of the obligation to pay for these items,” said Rahul Mehta, Chief Mentor, CMAI.

MSME apparel makers may face losses up to ₹7K cr in Q4: CMAI

SHARLEEN D'SOUZA
Mumbai, 18 February

MSME apparel manufacturers are expected to face a loss of ₹5,000-7,000 crore in the January-March quarter, according to the Clothing Manufacturers Association of India (CMAI). The association representing the Indian apparel industry cited an amendment to the Income Tax Act that states payments to micro, small & medium enterprises (MSMEs) need to be made within 45 days. This, the CMAI claims, in turn, has pushed retailers to cancel orders with MSMEs and opt for MSME players.

Typically, the retail industry follows a credit day cycle of 90-120 days to make payments; this

sometimes even extends to 180 days.

Last year, Section 43B of the Income-tax Act was amended and Section (h) was added. This stated that any sum payable by the assessee to an MSME beyond the time limit set in Section 15 of the Micro, Small and Medium Enterprises Development (MSMED) Act, 2006, is eligible for deduction; it comes into effect from the assessment year 2024-25.

According to the amendment, if payments are not done within 45 days, they will count as income and will only become an expense once it has been paid.

"It is common for even well-regarded retailers to follow this timeframe for settling payments.

Consequently, the expectation for retailers to amend their business models immediately to accommodate a 45-day payment cycle is highly unrealistic," the CMAI said in a note.

"Moreover, a significant number of retailers are contemplating the return of unsold merchandise to the manufacturers, thereby absolving themselves of the obligation to pay for these items," it said.

Rahul Mehta, chief mentor at CMAI explained that retailers will look to place orders with manufacturers that don't fall under the MSME bracket and where they don't have to comply with payments being made within 45 days.

Readymade garment exports up in Jan

Dhirendra Kumar
dhirendra.kumar@livemint.com
NEW DELHI

India's export of readymade garments grew significantly in terms of value in January as shipments stuck due to the Red Sea crisis were able to reach their destinations by taking the longer route around the Cape of Good Hope in Africa.

The export of ready-to-wear textile products increased 11% to \$11.57 billion in January from \$10.13 billion in December 2023, according to the commerce ministry data analyzed.

To be sure, volume data for these shipments was not available on the Niryat portal of the commerce ministry.

In the first 10 months (April 2023-January 2024) of the current fiscal year, the export of all textiles stood at \$27.69 billion, less than the \$29.41 billion in the corresponding months of 2022-23.

The main buyers of Indian readymade garments (RMG) were European nations led by Germany, the Netherlands, Italy, Poland and Denmark. These countries recorded a month-on-month growth of 19%, reaching \$4.30 billion in January. According to a government official, who wished

not to be named, the increase in RMG exports in January could be attributed to the movement of shipments that had been booked in advance but were on hold due to the Red Sea crisis that began in early November.

"We are currently analyzing the data. It is possible that new bookings were fulfilled in January, as there is a conventional trend of export growth in the last quarter following a sluggish start in the first two quarters," the official

elaborated.

Yemen-based Houthi rebels have been targeting ships in the Red Sea—a busy trade route—in reprisal for Israeli bombing of Gaza. As much as 80% of India's merchandise trade with Europe passes through the Red Sea. Key products such as crude oil, auto and auto ancillaries, chemicals, textiles and iron and steel

have been affected by the crisis. "Red Sea crisis will make things a little more expensive, and it is impacting everybody. India

cannot be seen separately. It will also impact exports of Bangladesh, China, and others. Overall, global trade has become more expensive because of the Red Sea crisis," said Rahul Mehta, president, Clothing Manufacturers Association of India (CMAI).

"I don't see any significant upswing in textiles export in global trade. The sentiments continue to be depressed. The next months of this fiscal will remain the same; no major upswing is expected," Mehta said.

Queries sent to the textiles ministry remained unanswered till press time.

Indian exports are facing higher shipping costs due to rerouting from Africa. Around 95% of vessels have rerouted around the Cape of Good Hope adding 4,000-6,000 nautical miles and 14-20 days to journeys, the commerce ministry had stated in a report last month, a copy of which has been seen by *Mint*.

India is the world's sixth-largest exporter of textiles and apparel, with the domestic apparel and textile industry contributing about 2.3% to the country's GDP, 13% to industrial production, and 12% to exports.
