

India's Largest **Fabrics and Accessories** Sourcing Show

6TH EDITION

2 | 3 | 4
APRIL 2026
BOMBAY EXHIBITION CENTRE
MUMBAI

Shaping India's Apparel Industry

A prominent association in the Indian Apparel Industry, founded in 1963. It represents over **5,000 Indian Brands** and Manufacturers, **50,000 Retailers**, and **2000+ Platinum Dealers** - top retailers in the country, in terms of turnover, segment practices, ethics and fairness in dealings.

The Association acts as a catalyst of Change, Evolution, and Transformation by interacting with the Government to encourage industry-friendly policies, including GST, PLI, Duty Drawback, Export Promotion Schemes, and more. It is also focused on promoting ESG and sustainability in the workplace.

It is renowned for organizing the industry's largest and most popular - National Garment Fairs (NGF), which attracts over **1,500 Brands** and **50,000+ Retailers**. CMAI has also introduced various other formats which are becoming leaders in their respective categories.

Fabrics, Accessories & Beyond

FAB Show, launched in 2022 is already established as the premier convergence hub for the entire garments manufacturing supply chain. The FAB Show serves not only as a platform for showcasing the latest in technological advancements but also as a catalyst for raising awareness about sustainability and understanding evolving consumer preferences.

Message from
Naveen Sainani
Chairman, FAB Show

The FAB Show was conceptualized and launched by The Clothing Manufacturers Association of India (CMAI) with a clear vision - to support the Members of the Garment Industry in meeting their sourcing requirements under one roof. Over the years, the Show has evolved into a premier platform that brings together fabric manufacturers, accessory suppliers, and garment brands from across the nation.

Each edition of the Show has set new benchmarks in innovation, scale, and networking opportunities. The upcoming edition promises to be even more dynamic, offering unparalleled sourcing advantages and future-ready insights for the apparel industry.

Key Highlights:

- New Innovations shaping the future of fabrics and accessories.
- New Suppliers from across India, offering the latest collections and sourcing options.
- AI in Fashion – accelerating sampling processes, making them faster and more cost-efficient.
- International Buyer & International Pavilion, expanding global reach and opportunities.
- Cost Efficiency through multiple sourcing choices under one roof.

I invite all stakeholders of the garment and textile value chain to participate along with entire sustainability related value chain, explore, and experience the unmatched opportunities that the FAB Show offers. Together, let us continue to drive innovation, strengthen collaborations, and take India's apparel industry to greater heights.

Indian Manmade Fibre Industry

Indian Manmade fibre (MMF) textile industry is vibrant and growing. Today, India produces almost all the types of synthetic fibres, be it polyester, viscose, nylon or acrylic and hence we are at the advantage compared to any other nations across the world. Currently, we are the 2nd largest producer of both polyester and viscose globally. MMF textile industry in India is self reliant across the value chain right from raw materials to the garmenting. Our fabrics are international standard and known for their excellent workmanship, colours, comforts, durability and other technical properties. Due to heavy investments in world-class manufacturing plants, continuous innovation, untiring entrepreneurship, new product mix and strategic market expansion, India is soon going to cloth the entire world and set to take centre stage in the global arena.

- BLENDED FABRIC, 1,1080 MN. SQ. MTR.

PRODUCTS SHARE

- Fibre 10%
- Fabrics 33%
- Yarn 32%
- Made-ups 25%

India-China Textile Business

China has been a major supplier of fabric to India and accounts for about 62 % of the total fabric import of India from the world. During the last 5 years imports of certain type of fabrics, especially the knitted fabrics have increased significantly. For e.g. imports of HSN 60063200 which is the largest imported fabric commodity from China, have shown a CAGR of 7.7 per cent in value terms and about 22.1 per cent in volume terms during this period. Moreover, its import unit price has also declined by about 40 per cent during this time frame. The present import prices of many of such fabric categories are significantly lower than the domestic viable prices. China is a manufacturer of a wide range of fabric including cheap fabric as also high-performance fabrics. The impact of textile imports from China on the Indian textile industry is significant and poses various opportunities. Chinese textile industry have advantages like price competitiveness, quality perception, and technological gap. Chinese imports thrive on compete price, profitability and expansion. Moreover, Chinese manufacturers have advantage in technology adoption and modernization, which results in a better productivity.
